MEMORANDUM FOR: Chief, Manufacturing and Services Division, ORR

ATTENTION: [REDACTED]

Declass Review by NGA.

FROM: Chief, CIA/PID (NPIC)

SUBJECT: Chung-king Cement Plant, Communist China

REFERENCES: (1) ORR Requirement No. RR/119/63
(2) ORR Requirement No. C-RR3-80,379
(3) CIA/PID Project No. C 657-63
(4) CIA/PID Project No. C 975-63

1. This memorandum is in answer to referenced requirements concerning the level of activity and the type of process utilized at the cement plant located at Chung-king, China.

2. In answer to the requirement, the following photo enlargement is furnished: CIA/PID/IB-P-307/63. This cement plant has two parts: an original plant which was in operation at the time of photography and a new facility which was not. It is reported that the old plant is a wet process but this cannot be confirmed from the photography. Since the kilns are covered in the old plant an accurate count cannot be made, but the presence of two stacks could indicate that there were from two to four kilns in this part of the plant.

3. The new plant, which was not in operation at the time of photography, appears to be a dry process. This part has one rotary kiln which can be seen easily on the photography.

4. The photo analysts on this project were [REDACTED] [REDACTED] who may be contacted on [REDACTED] should you have further questions regarding this project. [REDACTED]

ENCLOSURES:

1 Photo Enlargement (CIA/PID/IB-P-307/63)
